| January 27 | English II |

“Before anything else, preparation is the key to success.”

~ Alexander Graham Bell

-Mrs. Alma Cavazos

* *Congratulations to Nayla Medina, 9th grade, and Jose Manuel Barron, 12th grade, for winning a Mini- iPad drawing for attending Saturday Tutorials. There will be another drawing in May!

Principal's Message

Happy New Year 2016 and welcome back to JEHS! The 2nd semester starts on January 19, 2016 and there are some important things you should focus on. Students remember to work with your counselors to ensure that you are taking the correct classes needed to graduate. Also, make sure to register for the TSI college entrance exams offered here at JEHS if you are preparing to take college-credit courses. Seniors, you need to pay extra attention to your senior credit checks and the financial aid office to ensure a smooth transition to an institute of higher learning after graduation on June 4, 2016. Good luck to all of the extra-curricular activities underway (soccer, basketball, wrestling, powerlifting, tennis, UIL, Fine Arts Solo & Ensemble Competitions, One Act Play, etc.). Remember Johnny Economedes was the Fire Chief for the City of Edinburg from 1977 – 1999 and set a positive example for others to follow. Continue doing your best to honor the namesake of your school. Go Jaguars!

- *Dr. Anthony Garza*

Attendance

On Friday, January 22, 2016, there will be a Student Best Attendance BBQ during the lunch periods. The students will be selected based on 1st semester attendance. There will be another Best Attendance BBQ in May for the 2nd semester. Great Attendance equals awesome grades!

-Mr. Mark Gordon

SAFETY

Ladder Safety

Ladders are involved in many accidents, some of which are fatal. Your life literally can depend on knowing how to inspect, use, and care for this tool.

Inspecting Ladders

1. Loose or missing rungs, cleats, or bracing;
2. Loose nails, bolts, or screws;
3. Cracked, broken, split, dented or badly worn rungs, cleats, or side rails;
4. Missing or damaged side rails or foot pads.

If you find a ladder in poor condition, don't use it. Report it. It should be tagged and properly repaired or immediately destroyed.

-Mr. Juan Martinez, Jr.
